

## Søgeprotokol for Nationale Kliniske Retningslinjer – pulje nr. 21

<b>Projektitel/aspekt</b>	<b>NKR for ikke-medicinsk behandling af hovedpinesygdomme – Guidelines søgning</b>
<b>Fagkonsulent / projektleder</b>	Louise Ninett Carlsen / Christel Høst
<b>Søgespecialist</b>	Kirsten Birkefoss
<b>Senest opdateret</b>	15.01.2020

<b>Baggrund</b>	<p>Hovedpine er en folkesygdom og 770.00 danskere lider af migræne eller hyppig hovedpine. Der findes forskellige medicinske behandlingsmuligheder, men mange er forbundet med hyppige og svære bivirkninger samt begrænset effekt. Mange mennesker med hovedpine søger derfor ikke-medicinske muligheder, enten som alternativ til den medicinske behandling eller som et supplement.</p> <p>Evidensen for den ikke-medicinske behandling er dog begrænset, og ofte giver den ikke et entydigt svar. Konsekvensen er, at anbefalinger til patienter ofte bliver baseret mere på erfaring/præferencer end på evidensbaseret viden. Det er et problem, da det giver en stor ulighed blandt patienter i behandlingsmulighederne.</p> <p>.</p>
